*Note: This includes the entire system and full associated components (suspension, tile, acoustic pad and associated fixings)*
SAS200 is a concealed grid suspended ceiling system offering significant creative flexibility. The highly adaptable system is often used as a basis for fully bespoke designs. Due to its inherent versatility, the J-Bar hook on system can be used in a wide variety of applications.

**Module Sizes**
There are no standard tile sizes for SAS200. Tiles can be up to 3000mm in length and no less than 300mm wide. Bespoke module sizes and shapes are available on request.

**Access**
Tiles can simply be lifted and removed from the grid.

**Finishes**
SAS200 is available in all standard SAS finishes, please refer to page 105. Bespoke finishes are available on request.

**Perforations**
SAS200 can be manufactured with any standard SAS perforation. For our full range of perforations, please refer to page 83. Bespoke perforations are also an option.

**Acoustic Materials**
16mm deep, 80Kg density mineral wool pad with black tissue face, foil back and sides. Other acoustic materials are available, please refer to page 20.

**Service Integration**
Tiles can be formed with apertures during manufacturing and post painted for integration with lights and other services.

Please note Loads in excess of 6Kg require independent suspension.

**Technical Support**
Please contact our technical team for all questions relating to access, security, bespoke features, service integration or load support.

Please note Panels are supplied with a standard 3mm wide, black gasket.
