

PERSONAL SPACE MANAGEMENT |
DESK SCREENS

SAS INTERNATIONAL

SAS International is a British manufacturer of interior products meeting the ever increasing demands of clients and specifiers worldwide.

As governments around the world start to ease the rules around lockdown, the agenda for organisations will now be to look at ways in minimizing the transmission of Coronavirus within the workplace.

In light of this, the SAS team have developed a range of Personal Space Management products including Desk Screens.

Designed to be retrofitted into current commercial spaces, the screens contribute to the practise of social distancing without the occupier having to physically change the layout of the workplace.

The Product

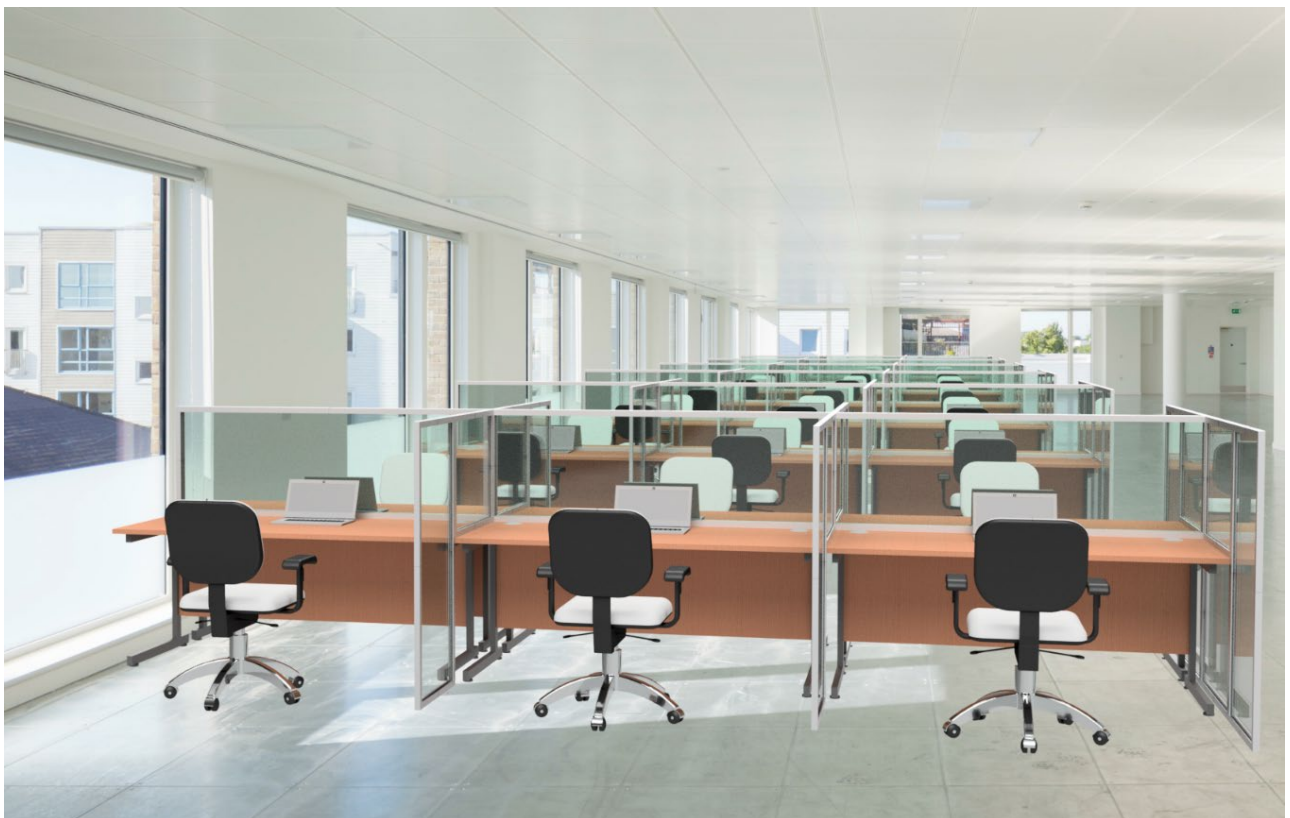

The SAS Desk Screens have been designed, engineered and manufactured in the UK, the sustainable solution is prefabricated and requires basic assembly. SAS have designed two versions of this product to suit different desk types which are:

- Desktop Partitions
- Standalone Partitions

The screens are available in standard sizes but are fully configurable to suit any office space.

In order to compliment the office design, the partitions can be manufactured to suit any office desk with a wide range of finishes and panel options including glazed, solid and any combination of both. When specified, the frames can be coated in an anti-bacterial coating to provide extra protection.

The cubicles will be tailored specifically to meet government guidelines on office social distancing measures.

Desktop Partitions

Designed to fit on top of existing desks with minimal assembly.

Standalone Partitions

Designed to fit around a standalone desks such as hot desks and reception areas.

High quality, durable and affordable.

With the uncertain nature of the pandemic, social distancing could be a practise maintained for the next few years, and so, SAS have designed a framed glass solution. The choice of glass over plastic means our customers are offered a product that is higher in quality, more durable yet still affordable. Key to the current situation and requirements, glass can be regularly cleaned without acquiring scratches or the 'milky' consistency which plastic is susceptible to.

The Features

- A solutions to re-open a workplace or place of business sooner
- Flexible products which can be modified or adapted to the office layout
- Robust solutions that will not need replacing during the potential timeframes proposed for social distancing measures
- Easy to clean and will withstand this on a frequent basis
- Aesthetic design options for corporate requirements
- Choice of finishes
- These products are designed & made from
 - Aluminum
 - Antibacterial paint finish options
 - Glass
 - Solid/Laminate faced panels

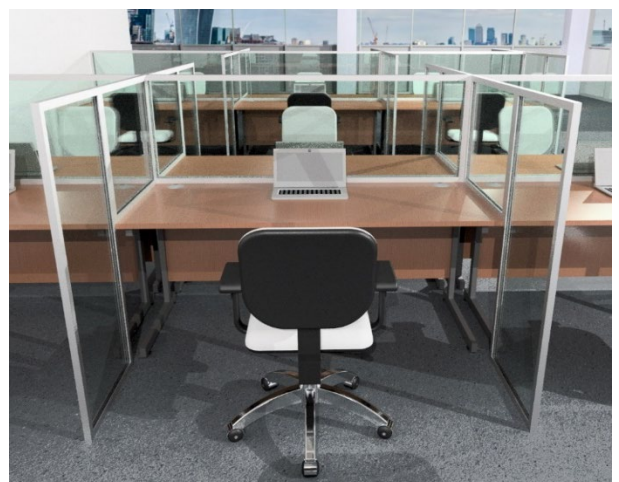

Installation

- Limited tools required
- Quick and easy to build
