Expertise and
innovation in
ceilings, from
design to delivery.

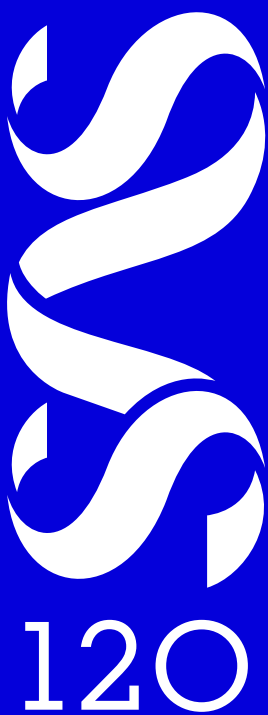

About

SAS are a specialist designer and manufacturer of aesthetic and performance ceilings. Operating globally, we partner with architects, contractors and their clients across 70 markets. Together we have created better places to work, travel and live in over 2,000 cities.

Since our foundation in 1968, we have always felt honoured by the trust people place in us to create a ceiling. SAS has contributed to landmark projects that will never be replicated - and enhanced the places people visit every day.

We believe the benefits of our ceilings can, and should, stand the test of time. It's why we've invested in more sustainable materials, and committed deeply to circularity. So that the spaces above us can add value for years to come.

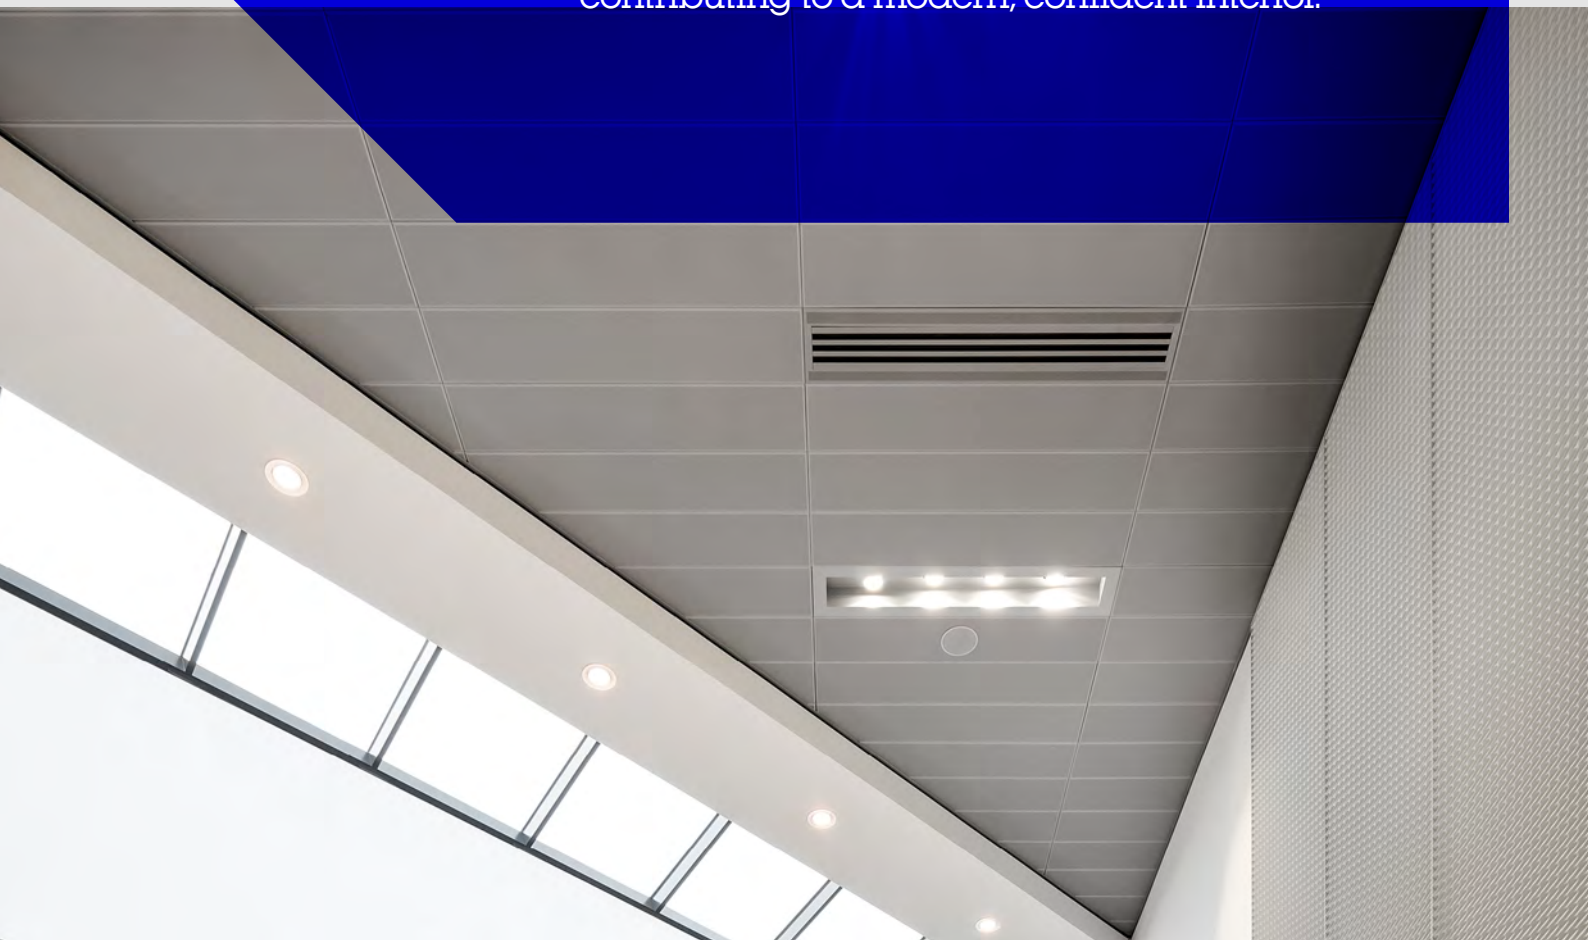

SAS120 is recommended for interiors requiring frequent cleaning regimes or an economical solution to secure access to the void.

Concealed grid clip-in tiles accommodate upward pressure without the risk of tiles being dislodged or displaced, whether from internal room pressure or a surface cleaning regime. If required, tiles are effortlessly demounted using a pull-down access tool, and voids can be secured through the use of a simple clip mechanism.

This system is the smart choice for dependable performance and clean design, delivering pristine, secure and easily accessible spaces. It proves that high quality and crucial functionality can be both economical and aesthetically clean, contributing to a modern, confident interior.

SAS12O Overview

- Clip-in tiles can accommodate upward pressure without the risk of tiles becoming dislodged
- Concealed grid design reduces tile misalignment and increases void security
- Closed butt joints with bevelled edges as standard
- Fully downward demountable tiles using an access tool
- Shallow construction height of just 83mm

Grid:	Concealed
Suspension:	Clip-In
Access:	Pull-Down
SAS Mesh:	No

Dick Lovett proudly opened a magnificent new Porsche dealership in Newport, Wales, showcasing the sleek SAS120 system throughout the space. This new showroom is one of the largest purpose-built Porsche dealerships in Europe, setting a superb new standard for the brand. The clip-in modular system provides the clean, contemporary aesthetic that perfectly complements the Porsche corporate identity, while ensuring services can be safely accessed for maintenance.
