

The renovation project was undertaken by renowned architectural practice Adjaye Associates, established in 2002 by Sir David Adjaye OBE. Their most well-known commission to date is the Smithsonian National Museum of African American history and culture, which opened in 2016 in Washington D.C.

*“In terms of complexity, it was more about designing all the parts to ensure they worked together seamlessly that was the challenge. The radius, size of the panels, details and suspension were all custom made, but we had the technology, ability, design and engineering capacity to fulfil the brief.”*

- Paul Aubrey, Divisional Director-North America, SAS International

# R3 - CASE STUDY

SAS International is a leading British manufacturer of quality metal ceilings and custom architectural metalwork for over 50 years.

Installed in iconic, landmark buildings worldwide, SAS leads through innovation, cutting-edge design and technical acoustic expertise.

Success is built on continued investment in manufacturing and achieving value for clients through world-class engineered solutions.
